Portfolio: <https://jaiden.dev>

Software Engineer with 11+ years of comprehensive experience, delivering **front-end leadership and cross-team integration**. Led client-side teams and launched three internal libraries which see daily use, **saving hundreds of man-hours yearly**. Launched robust products after iterative user testing. Aims to use these skills to improve the lives of others.

Employment history

Mar 2024 – Present

Software Engineer III

Beast Code

Fort Walton Beach, FL

Beast Code creates bespoke software solutions and immersive training simulations designed to optimize preparedness in the defense sector.

- **Led the application frontend team:** Selected to lead a group of engineers for client-side work when my team was split up into designated client & server-side roles.
- **Collaborated with customers:** Conducted user feedback sessions testing and participated in design summits at customer facilities nationwide for product enhancement and application vision clarification.
- **Successful product launch:** Identified critical feedback during user testing, ensuring a robust product launch.
- **Set the stage:** Co-developed a future roadmap for the app, setting the stage for scalable growth.

Apr 2022 – Mar 2024

Software Engineer II

- **Created company's first component library:** Spearheaded the creation of an internal component library, enhancing software development efficiency, enabling horizontal integration, and promoting visual cohesion between the company's many different apps.
- **Promoted large improvements:** Pioneered the company's use of NestJS and MongoDB over older, more incumbent solutions, cutting development time and decreasing friction across multiple teams.
- **Efficiency driven:** Architected an internal full-stack web application which greatly increased the productivity of another department.
- **Trusted advocate:** Represented Beast Code in a joint software project with other defense contractors.

Sep 2019 – Apr 2022

Software Engineer I

- **Hit the ground running:** Eagerly embraced new opportunities at Beast Code, contributing to 2 major project releases -- even pushing a small bug fix on day one.
- **Well-rounded:** Utilized Vue 2 and .NET as a junior developer.
- **Impactful performance:** Led the client-side development of MEGA, boosting Naval squadron operational efficiency by enhancing aircraft maintenance tracking and providing clear visibility of maintenance status.

Hobbies

- Golfing
- 3D printing
- Learning new things
- Building fun, novel app ideas
- Playing video games

- **Trend setter:** Participated in the development of applications which would ultimately give Beast Code a reputation for building quality applications quickly.
